HEZE

Factory Appearance Improvement

"At the Garden factory, we are not only crafting crafts, we are also redefining the working environment. At the moment, we are repainting the walls to put the workers in a relaxed and pleasant atmosphere. This is not only a simple decoration, but also an investment in the comfort and creativity of our workers. In this new workplace, every worker can be more happy to work, and every craft will become more dazzling because

of their hard work. The garden factory is not only a place of production, but also a source of creativity and happiness."

Environmental

We understand the importance of photooxygen equipment for air quality and the challenges that equipment faces after prolonged use. We use high-quality raw materials and advanced technology, in strict accordance with the standard operating procedures for renovation, to ensure that the quality of each equipment is stable and reliable.

Testing Center

We are pleased to announce that the renovation of our laboratory is well underway! We are about to usher in a new experimental environment, which will bring new vitality and impetus to our research work.

BAMBOO BLINDS

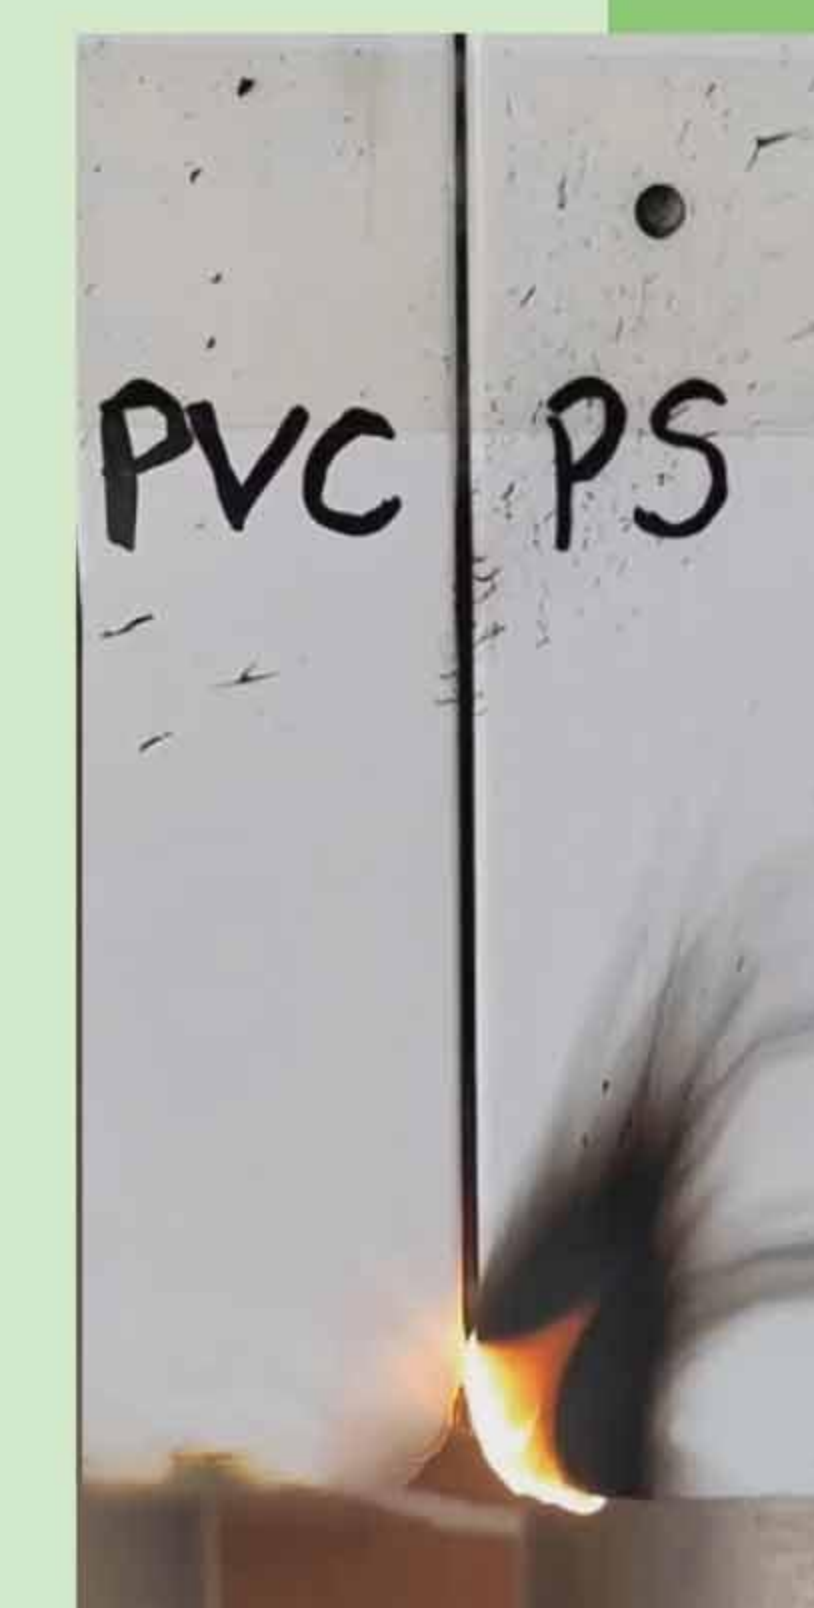

Huasheng industry conducted bamboo field trips and local factory studies this month. Learn more about the collection, processing and application of bamboo. Better understand the processing technology and technical level of bamboo, ensure the quality of processing products and processes of excellence, to provide customers with better quality bamboo shutter products.

PVC & PS BLINDS

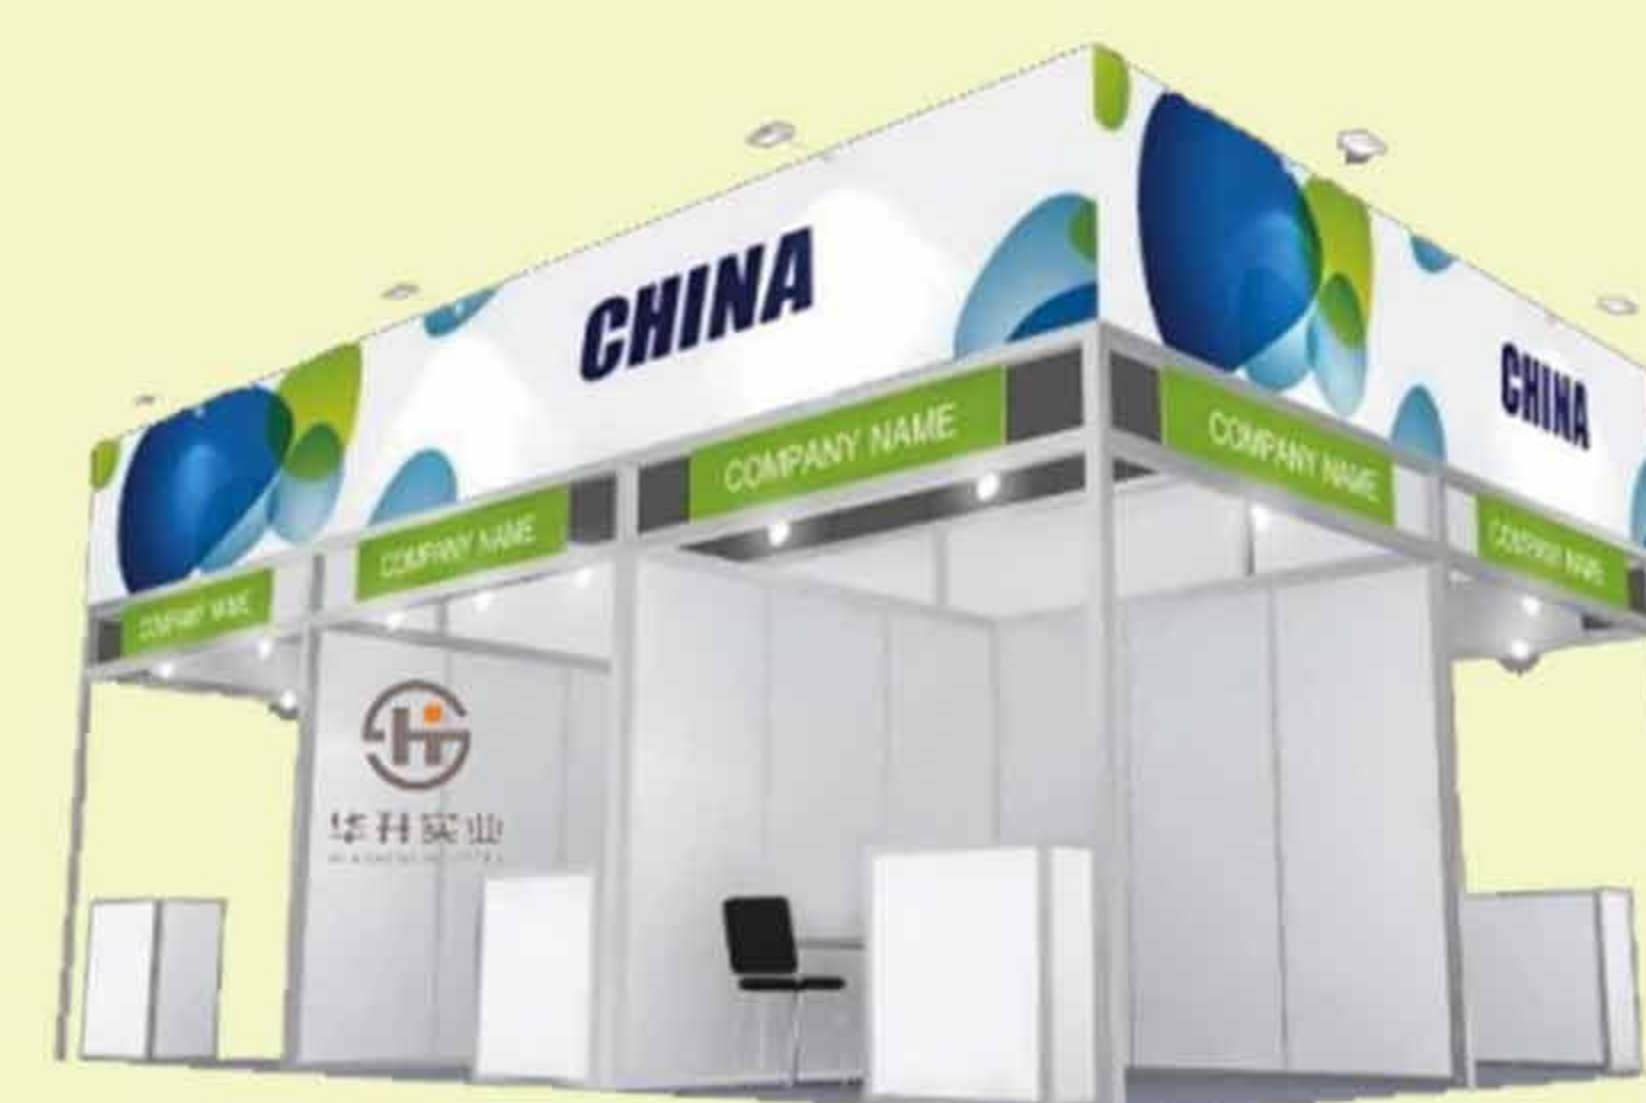

PVC: There is no flame under high temperature, and the burning stops when it is away from the fire. There is no pungent smell and no floating matter.

PS: It burns quickly when exposed to fire, with black substances floating away and a strong pungent smell. After a small burn, a large area of black material will be left on the wall.

SHUTTER TIPS

When considering kitchen and bathroom blinds, PVC blinds are a wise choice. Why is that? Because PVC material has the following advantages:

1、Water resistance: In humid environments, such as kitchens and bathrooms, PVC blinds are not susceptible to moisture, nor corrosion, and can remain beautiful for a long time.

2、Easy to clean: The kitchen and bathroom are easy places to stain, but PVC blinds can be easily wiped and will not become difficult to clean because of moisture and solidification.

3、Economical: Compared with other materials, such as wood or metal shutters, PVC is more economical in price, but it is beautiful and practical. Environmental protection: PVC material is an environmentally friendly material, and the blinds made with it will not cause adverse effects on the environment, which is in line with modern people's pursuit of sustainable development.

In summary, choosing PVC blinds provides a durable, easy to clean, affordable and environmentally friendly decoration option for your kitchen and bathroom.

Want an easy solution to your blinds cleaning problem? Don't worry, we have a simple yet effective tip: try our ostrich feather duster!

Blinds are an important part of home decor, but they're also a hiding place for dust and grime. The use of ordinary cleaning tools often cannot be completely cleaned to every corner, and it is easy to cause scratches on the surface of the curtain. However, our ostrich feather duster is made of soft ostrich feathers and can easily pass through the gaps in the blinds, sweeping away dust and dirt without damaging the curtain surface. This cleaning method is not only efficient, but also more environmentally friendly because it does not require the use of any chemical cleaners.

With our ostrich feather duster, you can easily enjoy the fun of blind cleaning and keep your home environment fresh and bright. Choose an ostrich feather duster to make your cleaning easier and more enjoyable!

Make the adjustment and cleaning of high blinds a breeze! Choose our telescopic rod, not only can easily adjust the light of the high blinds, but also quickly solve the cleaning problem.

Our telescopic rods are designed to be lightweight and easy to use, and can be easily extended to heights, so you don't have to climb ladders or use unstable tools. Whether it's adjusting the light or cleaning quickly, it's a breeze.

Make it easy to adjust and clean high blinds! Choose our telescopic rods to not only easily adjust the light, but also quickly solve cleaning problems.

Our telescopic rods are designed to easily extend to high places, so you don't have to climb ladders or use unstable tools. Whether it's adjusting the light or cleaning quickly, it's a breeze.

Choose our telescopic rods, so you can easily enjoy a bright and comfortable home environment without worrying about the trouble and danger of high blinds. Make adjusting light and cleaning a pleasant experience with our telescopic rods!
